Recession																
Probing depth																
Attachment loss																
Tooth	18	17	16	15	14	13	12	11	21	22	23	24	25	26	27	28
Attachment loss																
Probing depth																
Recession																
Plaque																
Bleeding																
Furcation																
Palatal																

Three sites a side for each tooth: distal, middle, mesial. Write recession as a positive number and overgrowth as a negative one; attachment loss = probing depth + recession. Put a dot in the bleeding or plaque box where you find it. Mobility 0 to 3, furcation I to III. Cross out the number of a missing tooth and write I for an implant in the note row.

Plan

☐ Oral hygiene instruction

☐ Refer to a periodontist

☐ Supragingival scaling

☐ Re-evaluate after:

☐ Subgingival instrumentation, quadrants:

☐ Supportive care every:
